Bale Arm Crate - Various Sizes & Colours

Bale Arm Crates are ideal for transporting fresh and frozen fruit, vegetables, prepacked meats and meals, as well as many other grocery products.

Product Code: **02-BAC4617** | **02-BAC4620** | **02-BAC4625**

Specification - 02-BAC4617

Footprint	Height	Internal Size	Unit Load	Weight	Stack Capacity	Pallet Quantity	Truck Quantity
600x400mm	167mm	574x378x141mm	15kg	1.47kg	145kg	265	5830

Specification - 02-BAC4620

Footprint	Height	Internal Size	Unit Load	Weight	Stack Capacity	Pallet Quantity	Truck Quantity
600x400mm	198mm	574x378x183mm	15kg	1.6kg	145kg	240	5280

Specification - 02-BAC4625

Footprint	Height	Internal Size	Unit Load	Weight	Stack Capacity	Pallet Quantity	Truck Quantity
600x400mm	252mm	574x378x222mm	13kg	2kg	145kg	150	3300

Bale Arm Crates can be recycled at the end of their useful life, Exporta can arrange this for you.

Material	Food Grade
Working Temp	0° to +100°
Delivery	Next Working Day

under OEM article numbers

B-1030 / B-1000 / B-1100 / B-1300 / B-1500 / B-530D / B-540 / B-4311 / B-4316 / B-4322 / B-4328 / B-4611 / B-4633 / BL-4030 / BL-4060

and the materials used to manufacture these articles comply with the regulation EC 1935/2004 in valid version at the time of the distribution of this declaration and corresponds as well to the regulation over good manufacturing practice for materials and articles intended to come into contact with food (GMP) 2023/2006/EC.

The overall migration and the specific migration are -within intended use- under the legal limit values in accordance with the regulation EU 10/2011. The used raw materials and additives comply with the consumer article regulation (and/or correspondences) into the European plastic regulation EU 10/2011 as well as the transition periods and changes of this guideline valid at the time of the distribution of this declaration.

The above mentioned product may contain substances with specific migration limit (SML), Annex II and maximum permitted quantity (QM) which are specified in the regulation EU 10/2011 with the respective limit values. The limit values of the total and specific migration are not reached or exceeded.

Material analysis	**Total Migration Limit**
95% Ethyl Alcohol Ref: TS EN1186/14 (Fatty Food Alternative Simulant)	Max Limit: 10mg/dm^2
3% Asetic Acid Ref: TS EN 1186/3 (Acidic Food, Food Simulant B)	Max Limit: 10mg/dm^2
Isooctane Ref TS EN 1186/14 (Fatty Food Alternative Simulant)	Max Limit: 10mg/dm^2
Poly (2,6 – Diphenylphenylene Oxide) (Dry Food, Food Simulant E)	Max Limit: 10mg/dm^2

Specification of the intended use or restrictions:

- Type(s) of food intended to come into contact with the material
  Contact with all types of food
- Test conditions
  Simulant B %3 Asetic Acid (40°C 10 days)
  Simulant D2 %95 Ethyl Alcohol (40°C 10 days) – Iso octane (20°C 2 days)
  Simulant E Poly (2,6 Diphenylphenylene Oxide) (40°C 10 days)

1. Type or types of food, which are not intended to come into contact with the product:
   Prolonged contact with hot products (above 30°C)
2. Time and temperature of treatment and storage in direct contact with the food:
   Any long term storage at room temperature or below, including when packaged under hot-fill conditions, and/or heating up to a temperature T where 70°C ≤ T ≥ 100°C for a maximum of t = 120/2^((T-70)/10) minutes.

This declaration is valid for the product which we send you and its use as specified above.

Traceability of the compliance is ensured by the description on product and the date of production.

The polymer and masterbatches that is used in Exporta Global Limited products is compliant for food contact. Migration tests have been done according to the regulation (EU) N0 10/2011. Test results show that migration level is under the permitted limits.

In case of deviation from the intended use, the user is responsible for verifying compliance and suitability.

This declaration is valid up to revocation and replaces all previous declarations for this article which are not valid anymore.
