Industrial box UN

Industrial box UN

This IBC (Intermediate Bulk Container) is suitable for the transportation of solid substances and is approved by the Belgian Packaging Institute (Ibe-BVI) with specific homologation codes and passed a drop test from 120 cm high at -30° C. Special seal made by double density EPDM. These containers are equipped with three crossbars and a sealed lid secured by two straps bound tight to the sidewalls of the box by a user-friendly system.

02 PEHD

Material: high density polyethylene (PE-HD), 100% reciclable.

Excellent resistance to shocks, stacking, temperature extremes, ultraviolet rays.
Non-toxic for food industry use.
Suitable for handling with fork lifts, lifting trucks and all types of tipping devices.
May be customised with the customer's logo.
